

ONLINE QUIZ MANAGEMENT SYSTEM

Project report submitted in partial fulfillment of the requirements for the award of
degree of

BACHELOR OF TECHNOLOGY IN INFORMATION TECHNOLOGY

Submitted By

320126511069 - CH BHAVANA

320126511083 - K DEEPAK SAI

320126511099 - R NAVYA

320126511106 - T JOHANAN FINNU

Under the guidance of

K SWATHI LAKSHMI DURGA

(ASSISTANT PROFESSOR)

**DEPARTMENT OF INFORMATION TECHNOLOGY
ANIL NEERUKONDA INSTITUTE OF TECHNOLOGY AND
SCIENCES(UGC AUTONOMOUS)**

(permanently Affiliated to AU, Approved by AICTE and Accredited by NBA & Naac with 'A' Grade)
sangivalasa ,Bheemili Mandal, Visakapatnam Dist(A.P) 2021-2022

DECLARATION

This is to certify that the project work entitled "ONLINE QUIZ MANAGEMENT SYSTEM" is a bonafide work carried out by CH BHAVANA, K DEEPAK SAI ,R NAVYA ,T JOHANAN FINNU. as a part of B.TECH second year 2nd semester of Information Technology of Andhra University, Visakhapatnam during the year 2020-2024.

We, CH BHAVANA, K DEEPAK SAI ,R NAVYA ,T JOHANAN FINNU. Students of fourth semester B.Tech, Information Technology from ANITS, Visakhapatnam, hereby declare that the project entitled "ONLINE QUIZ MANAGEMENT SYSTEM" is carried out by us and submitted in fulfilment of the requirements for the award of Bachelor of Technology in Information Technology, under Anil Neerukonda Institute of Technology and Sciences during the academic year 2021-2022 and has not been submitted to any other university for the award of any kind of degree.

320126511069 - CH BHAVANA

320126511083 - K DEEPAK SAI

320126511099 - R NAVYA

320126511106 -T JOHANANFINNU

ACKNOWLEDGEMENT

We would like to express our deep gratitude to our project guide K. Swathi Assistant Professor, Department of Information Technology, ANITS, for his/her guidance with unsurpassed knowledge and immense encouragement. We are grateful to Dr Poosapati Padmaja, Head of the Department, Information Technology, for providing us with the required facilities for the completion of the project work.

We are very much thankful to the Principal, ANITS, Sangivalasa, for their encouragement and cooperation to carry out this work.

We express our thanks to all teaching faculty of Department of IT, whose suggestions during reviews helped us in accomplishment of our project. We would like to thank all non-teaching staff of the Department of IT, ANITS for providing great assistance in accomplishment of our project.

We would like to thank our parents, friends, and classmates for their encouragement throughout our project period. At last but not the least, we thank everyone for supporting us directly or indirectly in completing this project successfully.

PROJECT STUDENTS:

320126511069 – Ch Bhavana
320126511083 – K Deepak Sai
320126511099 - R Navya
320126511106 - T.Johnan Finnu

ABSTRACT

The main aim of developing this online quiz management system is to conduct an online quiz on different topics to the users. In this Java Application, the user can attempt a quiz on various subjects to test their ability. Admin in this application can add questions in their respective subjects and can also see the result of the users in a table.

So the project mainly helps the teachers to conduct quizzes to their students and to understand their level of growth in those subjects .Easy to attempt quiz for users and can view their scores after submission of quiz.

INTRODUCTION

The project aims to design an Online quiz management system application which enables the Users to attempt the quiz and to see their result and admins to create the quiz and see the results of the users who attempt the quiz.

OVERVIEW

The quiz management system provides service to the admins and the users. After login to their desired subjects users can attempt the quiz and see their result after completion of the quiz. Admins can create quiz and see the results of the users.

PURPOSE

Introduction to online quiz management system in java. This system in java enables the users to test their ability online. We can do this by using Java swing, Java awt standalone application.

SCOPE

Our project will be able to be implemented in future after making some changes and modifications as we make our project at a very low level. So the modifications that can be done in our project are:

To make it screen touch so no need to touch key buttons and one more change which can we made is to add snaps of the person who use it.

SYSTEM REQUIREMENTS

SOFTWARE FORNT END REQUIREMENTS:

- The fornt end for Online quiz is java Swing
- We are using ECLLIPSE

SOFTWARE BACK END REQUIREMENTS:

- The back end for Online quiz is Oracle

Problem statement

Online Quiz Management System is an intelligent prototype developed as a Multiple- Choice Questions (MCQ'S) examination system which is built as a Java based application. The main objective of this is to efficiently evaluate the marks of students using a fully automated system. This system not only saves a lot of time but also gives fast results. The core underlying automation of the online quiz management will generate questions and options on the fly basis and capture the answers from students into the database. It ensures that students will have the Mock Tests for practice and can get the results displayed in their panel.

Program code

//HOMEPAGE

```
package program;
import javax.swing.*;

QID	QUESTION	OPA	OPB	OPC	OPD	CRCT
Q1	What is a correct syntax to output "J" in Java?	print("J");	echo("J");	System.out.println("J");	Console.WriteLine("J");	System.out.println("J");
Q2	Which is the below language is not present in DBMS?	DOL	DCL	TCL	IPL	IPL
Q3	A Multiplexer (MUX) is a device that combines _____ signal/signals into _____ signal/signals	single to multiple	multiple to single	multiple to multiple	none of the above	multiple to single
Q4	memory-management unit (MMU)	memory management unit	mega memory unit	memory mapping unit	none of the above	memory management unit

Register page

A screenshot of a web browser window displaying a registration form. The background is a dark brick wall with a large, glowing pink question mark on the right. The form is a light pink rectangle with a white border. It contains the following fields: 'USER_NAME' with the value 'sample', 'USER_ID' with the value '1', 'DEPARTMENT' with the value 'it', and 'GMAIL' with the value 's@1'. There is a 'REGISTER' button at the bottom. To the right of the form is a small icon of a person at a laptop. The browser window has standard OS controls (minimize, maximize, close) in the top right corner.

Instructions Page

A screenshot of a web browser window displaying an instructions page. The background is a dark brick wall with a large, glowing pink question mark on the right. The instructions are displayed in a light pink rectangle. At the top left of the rectangle is an icon of a graduation cap on a stack of books. The text reads: 'INSTRUCTIONS :', 'Hello Students!! You have to attempt all the questions without skipping any questions. You have 4 options for each each question .you need to select only one option among them. Once you go for next question you can't modify the previous-question.Carefully select your options and attend the quiz', 'GOOD LUCK:)', and 'Are you ready to attempt the quiz!!!'. At the bottom center of the rectangle is a 'START' button. The browser window has standard OS controls (minimize, maximize, close) in the top right corner.

 **INSTRUCTIONS :**

Hello Students!! You have to attempt all the questions without skipping any questions. You have 4 options for each each question .you need to select only one option among them. Once you go for next question you can't modify the previous-question.Carefully select your options and attend the quiz

GOOD LUCK:)
Are you ready to attempt the quiz!!!

CONCLUSION

Java Swing is a part of Java Foundation Classes (JFC) that is used to create window-based applications it is built on the top of AWT (Abstract Windowing Toolkit) API and entirely written in JAVA.

Java Swing is very easy to use. Being platform-independent and lightweight its applications are significantly faster and reliable..

FUTURE ENHANCEMENT

The online examination system application is vast. It can be used in various sectors, schools, colleges, tuition centers, or individual tutors. Our Project can be further improved and developed to modify this desktop based application to web application .So that it can useful to every one to conduct online quizzes and to store the results .

we can also add some advanced futures like timer,compilers,image based MSQ's and etc...

.
